

## Samples Tweets

The following are sample tweets that we've prepared as part of our Social Media Update service. By allowing us to post pertinent information like this you can concentrate on posting "firm specific things" e.g..

- o featuring a member of the fee earning team each week.
- o commenting on what your staff might be doing at charity events etc.

The numbers across the top in the Tweet column are 70 characters long, this means that we can get around 120 characters of message, allowing up to 20 for the shortened URL that then redirects to your website.

We try and get a variety of topics posted, some will require one or other of our library services, others are independent such as news websites etc. The aim in the main is to drive traffic to your website but also to show how connected and in-tune with what's going on in the wider world.
